

Tutorial for EUNO • Governance Voting Portal

To vote on community proposals made in the EUNO • Governance Room:

1. Enter the Voting Portal through the link provided for each vote in the governance room.
2. Choose your vote from the dropdown menu under **Your Vote**, and copy to your clipboard by selecting the provided link **Copy vote to clipboard**¹.
3. Under the **Files** tab in your EUNO • wallet, choose **Sign Message**. You will see a popup window titled **Signatures**.
4. Input your Masternode address.
5. Paste your vote from **step 2** into the second message box, and select **Sign Message**. If your wallet is encrypted, you will need to enter your password in order to sign the message.
6. A **signature**, made up of 88 characters will appear. Copy this signature to your clipboard.
7. Go back to the **Voting Portal**, and paste this signature under the box titled **Signed Message**.
8. Select your Node from the **Masternode IP address + port** dropdown menu. You should now be able to see your Masternode address.
9. Click on **Submit Vote(s)**.
10. Congratulations! Your vote has been submitted and you are a valued community member who is actively contributing to the development and governance of EUNO • Coin. Results are announced once the voting timeframe expires.

Note 1: If you wish to vote with more than one masternode, select **Add Vote** and repeat the process before submitting your votes.

Note 2: If your masternode is setup on **Ubuntu**, replace steps **3**, **4**, and **5** with the following step and continue from step **6**.

Type signmessage <EUNO Masternode Address> <Paste your vote from Step 2>

*Example - signmessage EiNqNT4Ad8HdEva56okhP9M3da Yes

¹ You can also choose to type your vote when signing a message on your wallet application. However, given that the vote you cast is case-sensitive, it is preferable that you select one of the provided options from the dropdown menu and copy it to your clipboard.
